Problem solving

CAREER OBJECTIVE

I am a Full-Stack Web Developer with experience using the M E R N stack. In a previous career, I founded, owned, and operated a wholesale tea company called Gray Duck Chai. When I started, I knew almost nothing about tea and absolutely nothing about running a company, but through passion, curiosity, and a desire to succeed I was able to grow the company into over 300 locations before we were acquired by a national brand. Now, I use that same passion, curiosity, and desire to continue to grow as a web developer. I have been programming as a hobby since childhood, and I recently rekindled this passion by earning a certificate from the University of Minnesota Full Stack Coding Bootcamp. I finished the program with a 4.0 GPA and have built many front-end and back-end apps ranging in complexity. I am an ambitious developer who will bring creativity, knowledge, and an eagerness to always push myself to continue to grow in my field.

PROFESSIONAL EXPERIENCE

OWNER, OPERATOR
Gray Duck Chai, Minneapolis, MN / Oct 2012 – Jun 2019

- Use computers to organize and locate inventory, and operate spreadsheet and word processing software.
- Negotiate prices, discount terms and transportation arrangements for merchandise.
- Interview and work closely with vendors to obtain and develop desired products.
- Conduct staff meetings with sales personnel to introduce new merchandise.
- Develop strategies to advertise green products or merchandise to consumers.

IT INTERN
Digital Co-ordination, Minneapolis, MN / May 2011 – Jul 2012

- Maintain and administer computer networks and related computing environments including computer hardware, systems software, applications software, and all configurations.
- Diagnose, troubleshoot, and resolve hardware, software, or other network and system problems, and replace defective components when necessary.
- Configure, monitor, and maintain email applications or virus protection software.
- Design, configure, and test computer hardware, networking software and operating system software.
- Research new technologies by attending seminars, reading trade articles, or taking classes, and implement or recommend the implementation of new technologies.
